

PROFILE

Full Stack Software Developer with 3+ years of experience in designing and delivering scalable, performant, and secure web applications. Proficient in JavaScript, React, Node.js, Express, and microservices architecture. Demonstrated expertise in designing API-driven platforms, implementing complex frontend logic, and deploying full-stack applications. Strong problem-solving mindset with experience in DevOps practices, cloud hosting (AWS), and database design. High interest in AI and Large Language Models and its applications. Passionate about clean code, modern architecture, developer tooling, and building impactful software solutions.

WORK EXPERIENCE

Antares Tech

June 2022 – Present

Associate (Software) Designer

Remote (Noida, India)

- Designed and developed scalable REST APIs using Express.js, supporting role-based access and organization-specific logic.
- Led a multi-organization Widget Based Calculator and its platform tailored for B2B use cases.
- Architected complex frontend logic with advanced state management using React and Redux.
- Integrated PDF generation and templated email notifications via mail service.
- Built and maintained a modular, embeddable React widget compatible with CMS platforms such as WordPress and Squarespace.
- Collaborated closely with the product co-founder to define features, prioritize development, and shape roadmap decisions.
- Contributed to a podcasting platform enabling users to create and manage high-quality audio podcasts remotely.
- Contributed to AI-driven Proof of Concepts focused on automation and real-time transcription

Wizard One (Freelance Brand)

Jan 2019 – Dec 2021

Software Developer

Guwahati, India

- Led a collaborative team in designing and developing customized applications for Gunung Raja Paksi, an Indonesian Steel Company.
- Built a production item tracking system in warehouse logistics that reduced item misplacements by 50%.
- Developed and deployed 5+ custom web apps for local businesses across domains.
- Managed Linux server configuration and web server setup (Apache/Nginx) for deploying client applications.

EDUCATION

Tezpur University

Aug 2019 - July 2022

Master of Computer Applications

Tezpur, Assam, India

- Graduated with 8.29 CGPA

Cotton University

Aug 2015 - July 2018

Bachelor of Computer Application

Guwahati, Assam, India

PROJECTS

- **CovidAlerts.online:** Architected a real-time vaccine slot availability checker using **Apache** as the web server, integrating COWIN APIs and **Telegram** notifications. Assisted over **5000 users** in booking their first vaccine dose. Deployed and managed on an **AWS EC2** instance.
- **Tezpur University Computer Society:** Built a community-driven social network using Laravel for the CSE department.

SKILLS

Languages & Frameworks: JavaScript, Java, PHP, C, React.js, Next.js, Express.js, Laravel, CSS/HTML, Roo Code

Technologies: Node.js, REST APIs, MongoDB, SQL, Redux, Webpack, Microservices Architecture, LLMs

DevOps & Deployment: Linux, Apache/Nginx, AWS EC2, Server Configuration, Git, VS Code
